1Projects

- Stockify — Retail Inventory Android App** 🏠 *Java · Room DB · WorkManager · ZXing · MPAndroidChart · GitHub Actions*
- Offline-first Android app: barcode scanning, low-stock WorkManager push notifications, CSV/JSON backup-restore, 7-day trend chart, and bulk quantity adjustments with full audit logging.
 - Secure password hashing, FileProvider sharing, Material Design 3 dashboard with live KPIs, bottom-nav badges, and CI pipeline via GitHub Actions.
- ELEVARE — AI-Driven Career Discovery Platform** 🏠 *React.js · Node.js · Express.js · FastAPI · MongoDB · LLM · NLP · JWT*
- Full-stack platform with longitudinal behavioural analysis, psychometric profiling, NLP sentiment engine, and explainable AI delivering personalised career paths via an LLM-powered conversational interface.
- CyberScope AI — Real-Time WiFi Security Platform** 🏠 *Flask · SocketIO · Kali Linux · Nmap · Metasploit · Wireshark · SQLite*
- Integrates 20+ professional security tools for automated device discovery, port scanning, CVE detection, AI behaviour analysis, and live packet inspection via WebSocket dashboard.
- Drishti — Bharat Multimodal Earth Observation AI** 🏠 *FastAPI · PyTorch · Streamlit · CLIP · Swin Transformer · MuRIL · Docker*
- Satellite vision + Indic NLP platform (10 languages) analysing ISRO EO data (optical, SAR, hyperspectral) for flood/drought detection, NDVI crop advisory, and real-time GIS disaster alerts.
- Travel Agency Management System** 🏠 *Node.js · Express.js · MySQL · EJS · REST API · MVC*
- Full-stack web app for travel packages and bookings: RESTful CRUD APIs, MVC architecture, dynamic EJS templating, middleware logging, and live database-backed booking management.
- Selenium CI/CD Automation Framework** 🏠 *Java · Selenium WebDriver · JUnit 5 · Maven · GitHub Actions*
- Production-grade browser automation suite auto-triggered on every commit via GitHub Actions; covers JS execution, cookies, window management, screenshots, and cross-browser testing.

1Research

An NLP-Driven Ikigai-Based Career Recommendation Model Using Psychometric and Market Data
Novel framework fusing Ikigai philosophy, psychometric scoring, NLP sentiment analysis, and live labour-market signals to generate explainable, holistic career recommendations.

1Certifications

- Backend Development & API Creation | *Packt — Coursera*
- Node.js, Express.js & MongoDB Backend Development | *IBM — Coursera*
- Selenium Automation Testing | *Coursera*
- Introduction to Selenium | *an online course authorized by Coursera and offered through Coursera*
- Create Your First Automation Script Using Selenium and Java | *an online project authorized by Coursera and offered through Coursera*
- IBM DevOps and Software Engineering Professional Certificate | *IBM — Coursera (DevOps, Agile, Scrum, CI/CD, Cloud Native)*

1Awards & Achievements

- 1st Place — Cybersecurity Hackathon 2025, MIT ADT University
- Smart India Hackathon (SIH) Internal Finalist
- Class Representative (CR) — MIT School of Computing, MIT ADT University (2 Years)
- Participated in industry-led DevOps workshop; recognised for technical project presentations
